ABOUT US

Blue Workforce is a family business founded in Denmark, 2012 by entrepreneur Preben Hjørnet. We started out with a great vision of moving the world towards more sustainable industrial production. To do so, we have made a series of radical innovations of automation technology, making it much more ACCESSIBLE, AFFORDABLE and APPLICABLE than ever.

Our main priority in Blue Workforce is our customers' "job to be done". We design, operate and maintain each application as a digital twin in Blue Reality and we can create unique costumer solutions, by configuring and combining elements of our modular product platform.
